

Master of Science in Global Supply Chain Management—MS(GSCM)

The Global Supply Chain Management program builds on Krannert’s core strength in operations, supply chain management, and business analytics to provide skills that will well position you for a career in managing global supply chains. In addition to courses that will develop your contextual knowledge and problem solving skills, the program provides unique global project experience. The program includes students from Krannert’s global university partners, enabling a sharing of internship and work experiences.

#12 Graduate Supply Chain Program

Gartner's North American Rankings

#13 Supply Chain & Logistics

U.S. News & World Report

"I chose the Krannert School of Management based on its supply chain and logistics prestige, but just as importantly, I considered its diversity. Coming from an international logistics background, I realized the importance of understanding how to do business with stakeholders from around the world. At Krannert, if you want to know how to do business in another country, in many cases you can just ask one of your classmates. The faculty is also diverse. I have taken courses instructed by professors from at least six countries, all of whom bring industry experience to every class."

Dennis Hernandez, '17 MBA
