**PROGRAM HIGHLIGHTS**
- Newly designed courses incorporate coding in Python, one of the fastest-growing programming languages in the financial industry - and a top specialized skill sought by fintech employers and positions.
- The MS Finance program is STEM designated. Successful graduates of the program may be eligible for STEM OPT extension.
- No prerequisite finance course work is required.
- Learning in a team-based environment, students work with peers from across the United States and around the world, including other professional master’s program students offering insights into broader business principles. Students gain a global business perspective in their classroom and group interactions.
- Graduates prepare for careers in corporate finance; investment management; security analysis and brokerage; commercial and retail banking; and financial management of commercial and nonprofit organizations.
- Opportunity to take part in the Student Managed Investment Fund (SMIF), a unique program that provides real-world portfolio management and security analysis experience.
