THE PERSISTENT PURSUIT OF
BUSINESS INNOVATION
AT THE KRANNERT SCHOOL OF MANAGEMENT
At Purdue, we live to keep pushing, to keep going. That's why the education we offer at the Krannert School of Management provides students with a competitive edge that few institutions can match.

As a school that operates at one of the best STEM (science, technology, engineering and mathematics) universities in the world, Krannert has a unique culture. We take an analytical approach to best business practices. We bring innovation to how we manage projects and solve problems. We won't stop until we've caused something to more efficiently, more elegantly, more accessibly answer some of the world's toughest business challenges.

We persist toward learning how to think in new ways and innovating the world of business.

Smarter businesses. Better solutions. Bigger opportunities. They start at Purdue University. What's your pursuit?
Changing the world of business, one small step at a time

Our faculty cross-trains in both management and the sciences. Students collaborate across disciplines and courses, and our programs are the best in the country at integrating data science to solve real-world business problems. Take advantage of the experiences and opportunities we offer at Krannert for a fun, lucrative and meaningful career.

Uncovering new knowledge and possibility

Discover the robust opportunities and programs Krannert has to offer, connecting you to your next giant leap.

Minority students, historically underrepresented at Krannert, find community and support in the Dr. Cornell A. Bell Business Opportunity Program (BOP). Named for cultural barrier-breaker Cornell Bell, BOP has catapulted students of color into positions of national prestige. Graduates of BOP have become well-known corporate executives, business owners, entrepreneurs and leaders of social change.

High school students get a glimpse of the program during the Future Scholars Summer Camp. Top students across the country discover career options, boost leadership and teamwork skills, and get an up-close view of Purdue and Krannert during a week on campus. Current high school juniors from historically underrepresented minority groups with at least a 3.3 unweighted high school GPA are encouraged to apply.

For more information, email BOP@Purdue.edu

BROCK-WILSON CENTER FOR WOMEN IN MANAGEMENT

Learn from empowered female leaders how to thrive in the world of business. The Brock-Wilson Center for Women in Management supports women and men as they learn to lead effective, gender-sensitive teams. The Women in Management learning community for first-year students develops camaraderie and explores gender-related issues through coursework.

The weeklong Empowering Women in Business camp for high school students introduces young women to business careers and equips them with the necessary skills to succeed in college. Current high school sophomores and juniors are invited to apply. Purdue is proud to be an Undergraduate Partner School with the Forté Foundation, which encourages women to pursue leadership roles in business and provides support for women pursuing MBA degrees.

Find Your Fit
The Marshall and Susan Larsen Leaders Academy (LLA) is Krannert’s Direct Admit Program for undergraduates. LLA offers accelerated classes, applied learning experiences with industry, workshops, and leadership development opportunities to provide Larsen students with the professional presence sought by employers. The LLA learning community allows students to develop a cohort during their first year as they get a jumpstart on upper-division coursework. Students applying to Krannert with a minimum unweighted high school GPA of 3.7 and a 28 ACT or 1320 SAT are automatically enrolled in the program.

Other advantages include a mentoring program, where incoming students are paired with upperclassmen; Transformational Experience Grants of up to $1,000 to fund a life-changing opportunity; and a fully funded, short-term study abroad program for LLA students who have completed a FAFSA and show financial need. Admitted LLA students will receive more details on these programs from their academic advisors.

CareerBound is a new initiative for undergraduates that provides a personalized, data-driven roadmap for students to continuously improve their career readiness as they move through Krannert. Students use industry-recognized tools to measure and track their proficiency in several areas including critical thinking, communications, teamwork, professionalism, leadership, equity and inclusion, technology, and career and self-development.

Students develop skills competencies through a wide variety of co-curricular experiences and activities. These include study abroad trips, Career Treks, and case competitions as well as other experiential learning opportunities. Advisors routinely discuss CareerBound objectives and goals with students, and Krannert Professional Development Center staff provide coaching, career resources, and mentorship opportunities to students throughout their undergraduate program.

Through CareerBound, you will develop a portfolio of career-readiness skills and accomplishments that can be shared with prospective employers to help you land your first job and launch your career.

The Krannert School of Management offers several study abroad opportunities tailored specifically to the academic needs of its students, preparing global business leaders with analytical insight and cultural intelligence. Scholarships are readily available, and students gain economic and geographical knowledge that can’t be captured in a textbook. Find more than 100 approved study abroad programs all over the world at KRANNERT.PURDUE.EDU/UNDERGRADUATE/STUDY-ABROAD.

Using everything you’ve learned and relying on contributions from your teammates, case competitions challenge student teams to solve a real-world business problem. Students use critical thinking, organization and analysis to formulate a recommendation. Then, they use presentation skills to effectively communicate the solution to a panel of judges.

Judges reward creative solutions, in-depth analysis and visually interesting presentations. It’s a great way to network and develop skills. Plus, many competitions award cash prizes to top performers.
